

Community Conversations on Framing the Future

Let's keep the conversation going!

Come and hear what we learned in our fall 2015 community conversations on "Making a Special Place to Live Even Better." Find out what people have said about the challenges and opportunities for Lancaster County's future. Learn about **Places 2040** – a blueprint for the county's next 25 years.

Help us identify those catalytic, super-important, game-changing actions that will help to shape our future.

Some of the key issues that we have heard about include:

- **Managing growth** – making progress, but concerned about the type and pattern of development;
- **Transportation** - want efficient, flexible system with more alternatives and connections;
- **Parks, trails, and natural areas** – love them, but also care about the quality of the environment;
- **Urban places** - Lancaster City and our boroughs – glad to see reinvestment, but challenges remain;
- **Agriculture and farmland** – essential to our economy, identity, and sense of place; and
- **Thinking beyond boundaries** – need to promote cooperation, work together, and share resources.

Hosted by the
Lancaster County Coalition for Smart Growth and Lancaster County Planning Commission

Making Progress. Good for Everyone.

Come out and share your thoughts and ideas

OCTOBER 6 | Thursday
